IDENTIFIERS	*Appalachia

ABSTRACT

Presented is a catalog of 232 visual materials (films, slides, or videotapes) relating to identification and management of handicapping conditions of preschool children. Section I contains information on 118 visuals including title, type, length, production date, producer, distributor, cost, an evaluative summary, audience, and sources in the Appalachian area. Annotated visuals are also indexed alphabetically by title and categorically under the following headings: autism, Down's Syndrome, emotionally disturbed, hearing impaired, informational, instructional, language, learning disorders, mental retardation, physical and neurologically handicapped, visually impaired, and testing and assessment. Section II lists unreviewed visuals alphabetically by title within categories (such as films and videotape), and only title and distributor for each entry is given. (SB)

****
* Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original. *

VISUAL INFORMATION FORM (for updating catalog) 164

INTRODUCTION

This catalog has been developed to facilitate the selection of visual materials relative to the identification and management of handicapping conditions of preschool children. The audience--teachers, teacher aides, parents, students, and other professionals--may identify and request from information provided herein a particular visual with some assurance that it will meet needs and fulfill certain objectives.

GENERAL INFORMATION

In order to assure that information and descriptions of visuals annotated in this catalog were indeed relevant to handicapping conditions of preschool children, the following criteria were established for review and inclusion:

1. Visuals related to some aspect of handicapping conditions
2. Visuals related to the preschool years of development (0-6)
3. Content validity and technical quality were acceptable
4. Visuals were available from one or more sources in the Appalachian Region
5. Visuals had to be available for our review

The visuals annotated in SECTION I meet the established criteria. They were reviewed not only for content and technical quality, but also for their availability and usability. Persons in Appalachia responsible for training and staff development will find visuals on varying subjects suitable for such purposes. Where parent involvement and education are integral parts of a program, many of the annotated visuals will prove useful tools. Instructors and professors of higher education will find visuals listed which are suitable for introductory courses in Speech, Early Childhood Education, Child Development, Special Education, Psychology, and other related fields. Also, visuals may be selected for more advanced courses due to the technical content. Parents seeking information relative to the identification and management techniques of handicapped preschool age children will find films available covering very general as well as specific topics.

Additional visuals were identified and appear in SECTION II. The user will have to determine whether these visuals are relevant to their needs and if the content and technical quality are acceptable since they were not reviewed for this project.

The pages of this catalog have been printed on one side only. This will allow the user to note on the back of each page additional sources of visuals or comments concerning the visuals he/she has used.

SOURCES OF INFORMATION

The contents of this catalog came from many sources; existing catalogs, producer's informational brochures, written comments from interested sources, and from our own review sessions. In some instances, information and summary descriptions, being very adequate, were adapted from these existing sources. Care has been taken to assure that the information and summary descriptions are accurate. If mistakes or inaccuracies are noted, you may bring this to our attention by completing the form on page 164 of this catalog. Any further publication of this catalog will reflect these suggestions and corrections. This form may also be used to identify additional visuals which you feel should be included in this catalog as it is updated.

HOW TO USE THE CATALOG

This catalog of visuals is arranged in the following manner. The visuals reviewed and recommended are indexed in the INTRODUCTION section; first in alphabetical order, then by subject category or content area. The 12 subject categories used are: (1) Autism; (2) Down's Syndrome; (3) Emotionally Disturbed; (4) Hearing Impaired; (5) Informational; (6) Instructional; (7) Language; (8) Learning Disorders; (9) Mental Retardation; (10) Physical and Neurologically Handicapped; (11) Visually Impaired; and (12) Testing and Assessment.

The next part of the catalog, SECTION I, VISUALS ANNOTATED, contains a one-page entry for each visual reviewed. Information contained in each entry includes: title of visual, type, length, production date, producer, and distributor. This is followed by a brief summary description of the visual which was deemed appropriate after our review. The next part of the entry lists those persons who may benefit the most from the visuals as determined by our reviewers. The last part of the entry identifies additional sources in Appalachia, other than the distributor, where the visuals are available. It should be noted here that although the additional sources have been identified, they may have certain restrictions on usage of their visuals. In other words, the visuals may be restricted to a local region, or state, or to certain professional groups. An illustration of the one-page entry is shown on page 4.

Under SECTION II, VISUALS LISTED, we included potential catalog entries for which time or other reasons did not permit our review. These visuals appear alphabetically under the following seven headings: Films - Black and White; Films - Color; Filmstrips; Pictorial Pamphlets; Slide-Tape Presentations; Transparencies; and Video Tapes. Only the title and distributor are given for these visuals.

CHILDREN OF THE SILENT NIGHT ←------Title

Type---→ 16mm color film, 27 minutes ←------- Length

Producer: Perkins School for the Blind
Watertown, Massachusetts

Distributor: Campbell Films
Academy Avenue
Saxtons River, Vermont 05154

Sale: $190; Rental: Consult distributor

Appropriate comments after our review ------------------→

SUMMARY

This film shows how deaf-blind children are learning to talk, know the world around them, and become educated. The meaning of what it is for a child to be both deaf and blind is covered and specific techniques used in building speech are shown.

Although the film is somewhat public relations oriented, it is recommended for college level students of special education.

Persons who may benefit the most from the visuals as determined by our review -------→

AUDIENCE

- Teachers
- Other Professionals
- Students in Special Education

Sources identified have---------→ certain restrictions on usage. Visuals may be restricted to a local region, or state, and to certain professional groups.

SECTION I: VISUALS ANNOTATED

THE ABC's OF BEHAVIORAL EDUCATION

16mm color film, 20 minutes, 1971

Producer: Hallmark Films & Recordings, Inc.

Distributor: Hallmark Films & Recordings, Inc.
1511 East North Avenue
Baltimore, Maryland 21213

Sale: $150; Rental: $15

SUMMARY

This film describes the behavior modification program at the Anne Arundel County Learning Center. It emphasizes the relationships between Antecedents, Behaviors, and Consequences (A, B, C's) and describes how antecedents and consequences can be programmed into a school environment to influence staff and student behaviors.

AFRAID OF SCHOOL

16mm black & white film, 28 minutes, 1965

Producer: Robert Anderson Associates, Ltd.

Distributor: McGraw-Hill Textfilms
330 W 42nd Street
New York, New York 10036

Sale: $195; Rental: $15

SUMMARY

The film depicts problems of a six-year-old boy who refuses to go to school because of "fear" even after his parents try persuasion, bribery, and spanking. The parents display anxiety over the child's normal fear reaction toward school. Both parent and child find help through psychiatric treatment. By discussing his fears, the boy is finally able to face school.

AGGRESSIVE CHILD

16mm black & white film, 28 minutes, 1965

Producer: National Association of Mental Health

Distributor: National Association for Mental Health
1800 N Kent Street
Rosslyn, Virginia 22209

Sale: $150; Rental: Consult distributor

SUMMARY

The purpose of this film is to show that serious emotional problems often underlie difficult or puzzling behavior in children. It illustrates how parents' feelings and attitudes influence children's emotional development and behavior, with particular emphasis on the importance of experiences in early infancy on children's growth and emotional life. Play therapy and other modern techniques in psychotherapy, counseling, and special education are illustrated in a variety of ways.

This film had been dubbed onto a video tape at WMUL-TV Studios at Marshall University where it was reviewed and the technical quality was not good due to heavy usage. However, this does not mean that the film from the distributor would be of poor technical quality.

AND A CHILD GROWS

35mm color slides with audio tape, 12 minutes

Producer: Rutland Center Early Childhood Project

Distributor: Rutland Center Early Childhood Project
698 N Pope Street
Athens, Georgia 30601

Sale/Rental/Loan: Consult distributor

SUMMARY

This slide presentation (80 slides) provides advice to parents and teachers on where and how to seek help for handicapped children in Georgia. It progresses with information concerning the Georgia Psychoeducational Center Network (20 centers). The Rutland Center serves as a prototype for the other 19 centers.

Some information is given about developmental therapy employed at the Rutland Center and the process of the child's involvement in the network. The presentation would be good for review by general audiences interested in an overview of the Georgia project.

The slides are clear and sharp; the color is good and narration of the presentation is excellent.

AUDIENCE

ANYONE CAN

16mm color film, 27 minutes

Producer: Bradley Wright Films

Distributor: Bradley Wright Films
309 N. Duane Avenue
San Gabriel, California 94108

Sale: $240; Rental: $25

SUMMARY

The film demonstrates techniques for directly involving atypical children in motor skills which aid learning and improve self-image. It stresses active involvement of all children and the need to pace activities so that each child can achieve success. Many excellent ideas as used in this film.

AUDIENCE

Teachers
Other Professionals

16mm color film, 34 minutes, 1968

Producer: Scientificom

Distributor: Scientificom
Division of LaRue Films, Inc.
159 E Chicago Avenue
Chicago, Illinois 60611

Sale: $250; Rental: $12.50

SUMMARY

The film explores nine measurable areas of the Illinois Test of Psycholinguistic Abilities. The film could serve as an introduction to the ITPA for students in "testing young children" courses. The film does not deal with how to administer the test but gives good general information on it.

ASPECTS OF BEHAVIOR

16mm color film, 31 minutes, 1971

Producer: CRM Educational Films

Distributor: CRM Educational Films
220 12th Street
Del Mar, California 92014

Sale: $395; Rental: $35

SUMMARY

Representing a first look at psychology, this film shows how the psychologist works with people, animals, society, and the environment. The film focuses on such aspects of behavior as autism in children, group pressure, negative behavior, behavior in a mental hospital, our dehumanizing environment, and in light of man's "limitless potential," the possibility of designing new environments for human behavior. Students in psychology would benefit greatly from this film.

Eastern Pennsylvania Regional Resource Center
443 S Gulph Road
King of Prussia, Pennsylvania 29406

SUMMARY

Produced primarily for physicians but of interest to educators as well, this film demonstrates how a child psychiatrist examines a child, using "soft" or "subtle" signs to test for functioning efficiency. Deviations from the acceptable norm are shown.

The technical quality of this film is poor; however, the content validity is good.

AUDIENCE

AUDIOLOGICAL PROCEDURES WITH PRESCHOOL DEAF CHILDREN

16mm black & white film, 30 minutes, 1967

Producer: Psychology Cinema Register

Distributor: Psychology Cinema Register
Pennsylvania State University
6 Williard Building
University Park, Pennsylvania 16802

Sale: $53; Rental: $6.40

SUMMARY

In this film the parents of three preschool deaf children are individually counselled about how to deal with their children's hearing impairment. The presentation emphasizes audiological procedures and the interpretation of test behavior in relation to the child's ability to adjust to a nursery school environment. Technical in approach and presentation, the film is probably most useful for students in special education programs or teachers who intend to work with hearing impaired children.

AUTISM'S LONELY CHILDREN

16mm black & white film, 20 minutes, 1965

Producer: National Educational Television, Inc.

Distributor: Indiana University A-V Center
Bloomington, Indiana 47401

Sale: $75; Rental: $4.60

SUMMARY

This film explains the work of Dr. Frank Hewett, University of California at Los Angeles, as he attempts to teach autistic children to talk and identify objects. The film discusses the possibile effectiveness of the approach; it introduces a four and one-half-year-old patient and shows his behavior as he meets his parents for the first time in eight months.

BEHAVIOR MODIFICATION: TEACHING LANGUAGE TO PSYCHOTIC CHILDREN

16mm color film, 42 minutes, 1969

Producer: Appleton-Century-Croft

Distributor: Appleton-Century-Croft
Division of Meredith Corporation
440 Park Avenue, S.
New York, New York 10016

Sale: $475; Rental: $40

SUMMARY

The film, based on the pioneering work of O. Ivar Lovaas at UCLA, describes the use of reinforcement and stimulus fading techniques in the teaching of speech to psychotic children. Recording the development of four psychotic children, the film shows how self-destruction was suppressed through extinction and punishment and how imitative verbal behavior was established in previously mute children. Sound behavior modification techniques are demonstrated. The film is aimed specifically at a college and university audience.

A BLIND CHILD AND A SIGHTED CHILD

16mm black & white film, 30 minutes, 1964

Producer: Child Development Project

Distributor: Child Development Project
University of Michigan Medical School
Ann Arbor, Michigan 48104

Sale/Rental: Consult distributor

SUMMARY

The film documents both similarities and differences between a blind and a sighted child. Two infant children are compared developmentally at monthly intervals. The sighted child displaying normal development and interaction with his environment, while the blind child lags in development due to problems in interacting with his environment.

The film is very relevant to parents with young blind children and would be especially suited for students studying normal as well as abnormal development. It illustrates the importance of providing proper experience for those who are blind from the earliest months.

BRIGHT BOY, BAD SCHOLAR

16mm black & white film, 22 minutes, 1951

Producer: Contemporary Films

Distributor: McGraw-Hill Textfilms
330 W 42nd Street
New York, New York 10036

Sale: $150; Rental: $11

SUMMARY

The problems of school children who have difficulty in learning and do not perform on a level consistent with their intelligence are examined in this film. The film gives some ideas about what can be done to help these children. Information contained in the film may be somewhat dated due to the 1951 production date.

THE BROKEN BRIDGE: THERAPY FOR AUTISTIC CHILDREN

16mm color film, 35 minutes, 1970

Producer: Time-Life Films, Inc.

Distributor: Time-Life Films, Inc.
100 Eisenhauer Drive
Paramus, New Jersey 07652

Sale: $400; Rental: $40

SUMMARY

Shows actual therapy sessions over a period of six months, illustrating the remarkable methods used by the American therapist, Irene Kassorla, to restore the communication of autistic children with the outside world. To penetrate the walls of fantasy which imprison these children and block articulate speech, Miss Kassorla uses three simple steps: she teaches the child to imitate and repeat over and over the words she speaks; she teaches them to answer simple questions; and then she teaches the child to ask questions. The children are elementary school age. This film is one of the better presentations on the use of operant conditioning with emotionally disturbed children.

CAN YOU HEAR ME?

16mm color film, 26 minutes, 1968

Producer: Lester Cooper/American Broadcasting Company

Distributor: International Film Bureau
332 South Michigan Avenue
Chicago, Illinois 60604

Sale: $275; Rental: $12.50

SUMMARY

The efforts of the family of a deaf child to provide her with a normal life illustrates this film's central message: that it is difficult, but not impossible, to teach children to speak words that they will never hear. Mother and child are shown as they learn together at home and at the John Tracy Clinic in Los Angeles, drawing encouragement from other families who share their problem and, finally, from seeing the progress that therapy makes possible.

CARE OF THE YOUNG RETARDED CHILD

16mm color film, 18 minutes, 1965

Producer: Association-Industrial Films

Distributor: International Film Bureau
332 South Michigan Avenue
Chicago, Illinois 60604

Sale: $225; Rental: $15

SUMMARY

This film illustrates the importance of an adequate understanding on the part of parents and those working with the retarded regarding the normal progression of the motor-perceptual developmental phases of early childhood. A lack of awareness of the "signs" indicating retardation or other childhood diseases has caused many parents to become frustrated when their child has failed to learn to develop at a normal pace. In such cases, a progression of unpleasant failure experiences has often followed for the child. This film provides an overview of the basic principles of child development, diagnosis, training, and care of retarded children with varying levels of adaptive behavior. In addition, many of the day-to-day problems facing parents of the retarded are displayed. A flyer providing information for discussion leaders is included with the film.

FROM HERE TO THERE

16mm black & white film, 25 minutes, 1967

Producer: San Francisco State College

Distributor: San Francisco State College
San Francisco, California

Sale: $150; Rental: Consult dustributor

SUMMARY

The film demonstrates the development of incidental and specific skills in orientation and mobility of blind children. A chronological approach is used, beginning with the blind child as he enters school and continuing through high school. Limitation in ability to move around in an unfamiliar environment is undoubtedly one of the greatest handicaps of blindness. Learning specific skills and applying them in orientation and mobility to classroom teachers, school administrators, and parents. It is a fascinating, unemotional and factual introduction to the problems of the blind for their sighted schoolmates and for the unlimited general public.

Sale: $100; Rental: $10

SUMMARY

Daily living procedures, such as hand washing, dressing, and table setting, are shown as a means for developing coordination, concentration, and independence in young children. It is explained that these procedures have proven effective in aiding physical development and social-emotional growth, and have long been used in clinics for handicapped and retarded children.

IN A CLASS BY HIMSELF

16mm color film, 2 films, 30 minutes each

Producer: NBC Educational Enterprises

Distributor: Films, Inc.
440 Park Avenue, S
New York, New York

Sale: $250; Rental: $36

SUMMARY

One child in 20 in the United States is affected by minimal brain dysfunction. These children are hyperactive and also have visual and audio problems. Even though brighter than average, they mishear things. They overreact to stimuli and are often late talkers and lack coordination. These children most often fail in the classroom. This documentary focuses on ways the hyperactive child can be helped so that they can become self sufficient adults.

INFANTILE AUTISM - THE INVISIBLE WALL

16mm black & white film, 27 minutes

Producer: Dr. Bernard Rimland
University of Oklahoma Medical Center

Distributor: National Society for Autistic Children
Information & Referral Services
301 31st Street
Huntington, West Virginia 25702

Sale: Not available
Rental: $10
Loan: Free to chapters of the National Society for Autistic Children

SUMMARY

The film concerns itself with the professional, the mother, and the child himself. Dr. Bernard Rimland outlines the symptomatology and presents his theory of causation. Four mothers describe the disorder on a personal level. Their revelations are forcefully illustrated by cuts of the children themselves.

INTRODUCTION TO SPEECH PROBLEMS

16mm color film, 26 minutes, 1961

Producer: Dr. Frederick Marolisy
Wayne State University

Distributor: Wayne State University
Audio-Visual Products Center
680 Putnam Avenue
Detroit, Michigan 48202

Sale: $170; Rental: $5

SUMMARY

This film explores problems of sound mastery, stuttering, cleft palate, delayed speech, aphasia, and/or dysarthia. Twelve patients are used to illustrate the problems and appropriate therapeutic procedures are suggested. Very relevant to students in training as speech therapists and teachers in early childhood education.

IT FEELS LIKE YOU'RE LEFT OUT OF THE WORLD (The Learning Series)

16mm black & white film, 28 minutes, 1970

Producer: Robert Anderson Associates

Distributor: McGraw-Hill Textfilms
330 W 42nd Street
New York, New York 10036

Sale: $195; Rental: $15

SUMMARY

The film shows how low self-esteem, and fear of failure, in children with learning disabilities can lead to withdrawal from learning and active aggression. The parents speak of their frustration in getting help for their children. Dr. Sam Rabinowitch, director of the Learning Center at Montreal Children's Hospital, suggests guidelines for a sensible approach to children with learning disabilities.

KEVIN IS FOUR: THE EARLY DEVELOPMENT OF A CHILD AMPUTEE

16mm color film, 27 minutes, 1965

Producer: Ohio State University

Distributor: Department of Photography & Cinema
Ohio State University
Columbus, Ohio

Sale: $240; Rental: $12.50

SUMMARY

The film follows the early development of one of the 2,000 congenital amputees born annually in the United States. Kevin's left arm is amputated below the elbow, his right leg below the knee, and he has some toes and fingers deformed. His progress is followed from the age of 14 months when he received his first leg, through receiving his first arm at 19 months, till he is 4 years old and in nursery school. The importance of early fitting of prosthetic devices is stressed. The film also touches upon parent attitudes and the need of a handicapped child to be better than others at doing things. The film demonstrates how naturally a child amputee can develop despite his handicap.

MADISON SCHOOL PLAN

16mm color film, 18 minutes

Producer: Santa Monica Unified Schools

Distributor: AIMS Instructional Media Service, Inc.
P O Box 1010
Hollywood, California 90028

Sale: $125; Rental: $20

SUMMARY

The Madison School Plan, described in the film, provides for the education of exceptional children in a setting that allows for the free flow of children between the regular classes and a specialized facility called the Learning Center. The Plan involves the elimination of the traditional disability grouping for all but administrative purposes and includes an instructional program linked to a continuous assessment of the educational variables that operate to hinder the performance of the exceptional child in the regular classroom. The film projects a feeling of excess formality, frigidity, and nonmaterial barriers of a social nature in the behavior of children and administrators while trying to do away with labels.

Distributor: AIMS Instructional Media Services, Inc.
P O Box 1010
Hollywood, California 90028

Sale: $85; Rental: Consult distributor

(Purchase of film includes a question guide to stimulate thought and provoke discussion.)

SUMMARY

This film depicts colorful graphics and an original sound track emphasizing the essential meaning of the film that children respond to love and deserve acceptance for what they are--different, yes, but with a potential for happiness and productivity. Lisa's questions about herself and her world will encourage understanding of her potential by other children, parents, and teachers.

MENTAL RETARDATION, PART I

16mm color film, 30 minutes, 1966

Producer: Wisconsin Bureau of Handicapped Children

Distributor: University of Wisconsin
Madison, Wisconsin 54751

Sale: $195; Rental: $5.50

SUMMARY

This film, the first of a two-part series, concerns the profoundly mentally retarded, their needs as a group, and the progress being made in efforts on their behalf. It emphasizes comprehensive evaluation and formulation of plans for treatment of a mentally retarded child. Medical and other research, as well as activities in training centers, are among the subjects explored.

NATURAL HISTORY OF PSYCHOTIC ILLNESS IN CHILDHOOD

16mm black & white film, 19 minutes, 1960

Producer: New York University Film Library

Distributor: New York University Film Library
26 Washington Place
New York, New York 10003

Sale: $135; Rental: $9

SUMMARY

The film setting is in a community near London, England. It takes one psychotic child and traces its history of development via photos, diary, and home movies. Normal behavior slowly degenerates into psychotic behavior. A brother's birth is the turning point for degeneration. The film is a good training film for those persons preparing to work with emotionally disturbed children.

PUBLIC SCHOOL PROGRAMS FOR THE PHYSICALLY HANDICAPPED

16mm color film, 25 minutes

Distributor: Continental Film Group
P O Box 142
Elk Grove Village, Illinois 60007

Sale: $275; Rental: Consult distributor

SUMMARY

This film is divided into two parts: preschool children ages 3-6 are shown in various activities in a public school special education class; and older multi-handicapped children are shown using appliances and equipment necessary in a public school program for more severely handicapped children. The necessity for starting early in life is emphasized, while showing how a teacher team approach with a non-structured situation can effect gains in normal pre-school areas. Teachers make deliberate mistakes to accustom children to accepting their own failures. Physical therapy is included in the program. Understanding and education of parents and society is stressed. The necessity for individual programs for the older multi-handicapped child is shown and a teacher-therapist planning conference underlines this. It is suggested that regular teachers could do more if they had more information, training, and understanding and less sympathy. The film is particularly good for undergraduate and graduate classes in education and administration, as well as parent or civic groups where there is a drive for the establishment of such classes. Content validity is good; however, the particular copy of the film reviewed was old and had been used heavily.

REPORT ON DOWN'S SYNDROME

16mm color film, 21 minutes, 1963

Producer: International Film Bureau

Distributor: International Film Bureau
332 S Michigan Avenue
Chicago, Illinois 60604

Sale: $195; Rental: Consult distributor

SUMMARY

A comprehensive statement of Down's Syndrome, previously called Mongoloidism, from its first description by Langdon Down in 1866. The film outlines general characteristics and treatment methods and the latest findings in the area of genetics through sequences of two mongoloid children over a six-year period. The film provides information from first diagnosis through guidance and help offered by professionals. A guide is available with this film.

SAGA OF THE TROUBLED CHILD

35mm color slides with audio tape

Producer: TAPEC

Distributor: Technical Assistance Office
Rutland Center
698 N Pope Street
Athens, Georgia 30601

Sale/Rental/Loan: Consult distributor

SUMMARY

A comical, cartoon approach to explaining four areas of the developmental curriculum in the Developmental Therapy Approach to teaching children who have severe emotional and behavior disorders (Behavior, Communication, Socialization, and Academic). The presentation goes through the five stages of normal development to guide teachers in planning appropriate sequences of experiences for the disturbed child.

This presentation needs to be shown in conjunction with and followed by the presentation, Growing Step by Step. Also, a trained discussion leader should be on hand to discuss Developmental Therapy after the presentation. The content validity and technical quality are excellent.

THE SCHOOL THAT LOVE BUILT

16mm color film

Producer: Human Resources School

Distributor: Human Resources School
I. U. Road
Albertson, New York 11507

Sale/Rental: Consult distributor

SUMMARY

The film depicts a model school for the handicapped and the educational opportunities provided within the school. Lots of nice equipment and facilities are available in the school--but this is not typical of schools for the handicapped. It shows what could be done if vast sums of money were available. The content validity is good, but unrealistic in terms of costs.

SEARCH FOR THE LOST SELF

16mm black & white film, 60 minutes, 1966

Producer: National Educational Television

Distributor: MLF Productions
267 W 25th Street
New York, New York

Sale: $400; Rental: Consult distributor

SUMMARY

This film was made at The League School, Brooklyn, New York. The behavior and teaching of several "psychotic" children are traced through the film. The impossibility of categorizing or diagnosing is stressed. Lack of awareness of self is often a central problem, so traditional psychotherapy has been abandoned for the approach of special education. The teacher is the chief therapeutic agent. The work of the neurologist is also shown and the film underlines disturbances and learning difficulties. The ability of the teacher to identify with the fears of the child is paramount since the basic question is that of the degree of intensity of the pathology, rather than merely its presence or absence. Phasing the child back into public school is also shown. The film is rather long and slow moving, and could be edited.

THE STORY OF A LEAF

16mm color film, 27 minutes, 1967

Producer: The Doctor Parkins School

Distributor: Campbell Films
Academy Avenue
Saxtons River, Vermont 05154

Sale: $195; Rental: $12

SUMMARY

Demonstrates the responses of moderately retarded children to various types of art training and the creativity which they possess. It follows the philosophy that the retarded child learns in the same way, possesses the same artistic creativity and individual style as all children everywhere. Thus, instead of concentrating on a particular or peculiar art curriculum for the retarded, the film reveals a program of varied media.

STRANGER IN HIS OWN COUNTRY

16mm color film, 30 minutes

Producer: National Society for Mentally Handicapped Children
London, England

Distributor: Kinsmen NIMR Building
York University
4700 Kelle Street
Downsview, Toronto, Canada

Sale: $209; Rental: Consult distributor

SUMMARY

Shows mentally retarded children, ages 4 upward, in training schools. Students placed in the training schools are trainable in range of ability. More like a sheltered workshop than a school.

The film is not very applicable to preschool handicapped children, but may be good for parents who want to know about sheltered workshops. It demonstrates that severely mentally handicapped children can acquire social and vocational skills when given appropriate care and training,many can undertake ordinary jobs in the open community.

TECHNIQUES OF NON-VERBAL PSYCHOLOGICAL TESTING

16mm color film, 20 minutes, 1964

Producer: International Film Bureau

Distributor: International Film Bureau
332 S Michigan Avenue
Chicago, Illinois 60604

Sale: $250; Rental: $15

SUMMARY

This film demonstrates how an infant as early as age 6 weeks can be evaluated developmentally by means of the Gesell Scale, Peabody Picture Vocabulary Test, Cattell Scale, Mare-Foal Completion Test, Merrill Palmer Scale, etc. It goes on to show other infants and young children at 2, 3, and 4 years of age, with a multitude of physical handicaps and unusual diagnostic categories, undergoing psychological tests in a clinical setting. The film is too specialized for general audiences, but very good for persons interested in psychological testing.

THERAPY THROUGH PLAY

16mm color film, 25 minutes, 1971

Producer: Movie-Lab, Inc.

Distributor: Movie-Lab, Inc.
619 W 54th Street
New York, New York 10010

Sale: $195; Rental: Consult distributor

SUMMARY

The film covers handicapped children from preschool to high school age involved in physical education activities, such as soccer, swimming, fencing, war ball, field hockey, golf, etc. It might change attitudes that handicapped children should be restricted in physical activities. The term play in the title might be a misnomer. Physical education might be more appropriate--which is fun and therapeutic, living or real life activities and not just play for the sake of playing.

TOWARD TOMORROW

16mm black & white film, 1961

Producer: Syracuse University

Distributor: Public Education Division
American Foundation for the Blind, Inc.
15 W 16th Street
New York, New York 10011

Sale: $110; Rental: $4.50

SUMMARY

Unposed series of sequences of nine blind children ranging in age from birth through kindergarten, taken in children's homes or schools. When problems occur with blind children, they seem less difficult if children have had a chance to enjoy kinds of experiences children in this film have been allowed to enjoy. Importance of a loving family circle, chance to explore environment, and chances for child to present to his family and friends his potentialities as well as his problems, is stressed.

VISUAL PERCEPTION AND FAILURE TO LEARN

16mm black & white film, 20 minutes

Producer: AIMS Instructional Media Services, Inc.

Distributor: AIMS Instructional Media Services, Inc.
P O Box 1010
Hollywood, California 90028

Sale: $130; Rental: Consult distributor

SUMMARY

This film is slanted towards showing the effects of visual perceptual disturbances and should not be used for teaching methods. With the statement that 10-15% of the kindergarten children suffer perceptual disability, the film shows children failing in manual tasks, reading, and writing. The behavior problems, such as withdrawal and fighting, resulting from failure are then documented. The Frostig Test is shown being given to children with problems in its five areas of eye-motor coordination, figure-ground perception, constancy of visual perception, perception of position in space, and spatial relationships. Remedial training (including tactile techniques) is then shown in the areas of eye and body movement, body concept and visual perception.

WHERE DO THE CHILDREN PLAY

16mm color film, 14 minutes, 1972

Producer: Jamieson Film Company

Distributor: Jamieson Film Company
3825 Bryan Street
Dallas, Texas 75204

Sale: $50; Rental: Consult distributor

SUMMARY

The film depicts what should not be done with mentally retarded children; that is, placed in a hospital or institutional setting. It carries a strong message against the dehumanizing effect of institutionalization of young mentally retarded children. It shows how children can benefit from placement in good community schools with rich stimulating environments.

WHICH KEY MY CHILD

1" Ampex black & white video tape, 20 minutes

Distributor: National Society for Autistic Children
Information & Referral Service
306 31st Street
Huntington, West Virginia 25702

Sale: Not available
Rental: $10
Loan: Free to chapters of the National Society for Autistic Children

SUMMARY

The video tape presentation is based on a play, written by a mother of an autistic child, which is acted out. It details the first moving steps in behavior modification therapy of a young autistic girl. It is a very good presentation of information on autism for parents and others working with children. The content validity was excellent; however the tape was of poor quality from heavy usage as well as damage in the mail.
